mex+1012 DTW

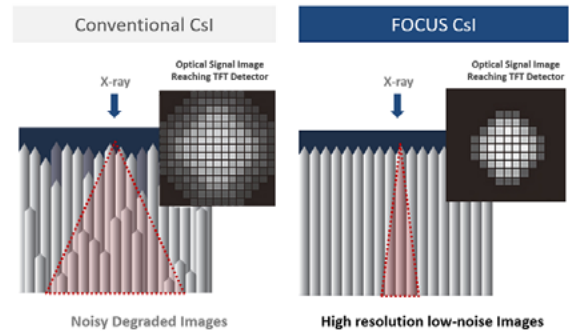

Premium Digital Radiography for equine practitioners

- High-end X-ray detector with clinical-grade performance
- Extremely fine and highly detailed images (just 76 µm)
- Reduced image noise due to FOCUS scintillator technology
- Fully wireless and lightweight (1.85 kg)
- Wi-Fi connection without a router
- High MTF (modulation transfer function) for brilliant visualisation of anatomical structures

DR Carrying Bag

FOCUS Scintillator Technology

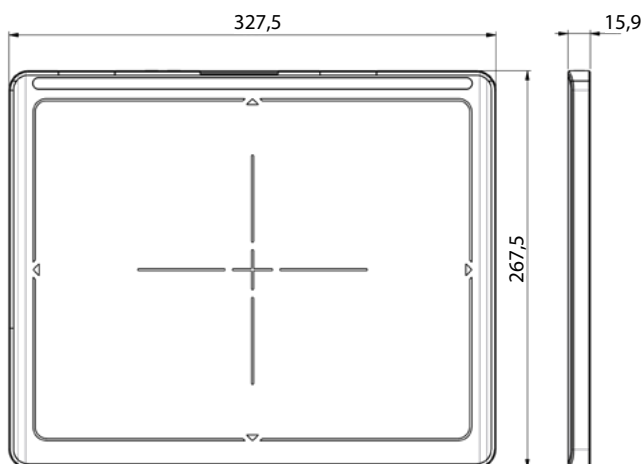

FOCUS Scintillator Technology utilises a specially structured CsI layer, which makes the light output more focused and efficient than with conventional CsI scintillators. This results in better signal transmission and reduces image noise.

meX+ Image Acquisition Software

- Simple and perfect images at all time
- Integrated automatic image optimization
- Touchscreen function for easy operating
- Fully integrated radiographic positioning guide
- Bones and soft tissue in one image
- Including Patient CD and DICOM Send function
- Adaption of almost every language possible
- Modern graphical user interface
- Safe and fast registration of emergency patients
- Entry of recurring examination procedures as macros

Dimensions

Specifications

Interface	wireless
Scintillator	Cesium-Iodide (CsI)
Dimensions	267,5 x 327,5 x 15,9 mm
Active Pixel Area	230 x 290 mm
Weight	1,85 kg incl. Battery
Pixel Pitch	76 µm
Resolution	4,6 lp/mm
A/ D Conversion	16 bit
Pixel Number	3072 x 3840 pixels
